

Development Environment Setup

Project Development Phase | Import Data Using Transform Maps

1. Objective

This document records how the development environment was prepared before building the import solution. A correct setup avoids permission errors and lost work later in the phase.

2. Environment Details

Item	Detail
Platform	ServiceNow Personal Developer Instance (PDI)
Instance URL	https://devXXXXXX.service-now.com (replace with your instance)
User role	admin (includes import_transformer)
Browser	Chrome / Edge (latest)
Source files	users_valid.xlsx, users_duplicate.xlsx, users_invalid.xlsx, users_large.csv
Version control	Update set: Import Users Transform Map

3. Setup Steps

Step	Action	Result
1	Sign in to developer.servicenow.com and request / wake a PDI	Instance available
2	Log in to the instance as admin	Full access to System Import Sets
3	Navigate to System Update Sets > Local Update Sets > New	Update set created
4	Name it 'Import Users Transform Map' and set it as Current	All changes are captured
5	Confirm roles under User Administration > Users	admin / import_transformer present
6	Open System Import Sets and confirm Load Data, Data Sources, Transform Maps modules	Modules visible
7	Create reference data: departments (e.g. IT, HR, Finance) in cmn_department	Lookups ready

4. Source File Layout

Column	Example	Required	Rule
First Name	Anita	Yes	Text
Last Name	Kumar	Yes	Text
Email	anita.kumar@example.com	Yes	Unique, lower case
Department	IT	No	Must match cmn_department name
Manager	ravi.s@example.com	No	Manager email

Column	Example	Required	Rule
Title	Analyst	No	Text
Phone	9876543210	No	Digits
Status	Active	Yes	Active / Inactive

5. Sample Data (users_valid.xlsx, first rows)

First Name	Last Name	Email	Department	Status
Anita	Kumar	anita.kumar@example.com	IT	Active
Ravi	Shankar	ravi.s@example.com	IT	Active
Meena	Iyer	meena.iyer@example.com	HR	Active
Karthik	Raj	karthik.raj@example.com	Finance	Inactive

6. Pre-Development Checklist

- Update set is set as Current.
- Reference departments exist.
- Source files saved with the exact header names.
- Test instance has no unrelated records that use the same email addresses.
